DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kitamura et al. 1. U.S. Patent No. 6,744,568.

Regarding claim 1, Kitamura et al. discloses an objective lens for focusing a light beam emitted from a light source on an information recording surface of an optical information recording medium, wherein the objective lens has a substantially truncated-cone-shaped portion on its surface on a side of the optical information recording medium (see Figure 3).

Regarding claim 2, Kitamura et al. discloses wherein the light beam passes through the substantially truncated-cone-shaped portion, and an upper surface of the substantially truncatedcone-shaped portion has a diameter larger than an effective diameter of the light beam passing through the upper surface (see Figure 3).

Art Unit: 2627

Regarding clam 3, Kitamura et al. discloses wherein a base of the substantially truncated cone-shaped portion of the objective lens has a radius RL2 smaller than 1.8 mm (radius of effective diameter is smaller, see col. 9 line 27 approx. 1.5mm), and a height H of the substantially truncated-cone-shaped portion satisfies height H>0.75 mm+necessary movement amount FD of lens working distance WD (see col. 9, lines 19-27, satisfied since center thickness is equal to 2.3mm).

Regarding claim 4, Kitamura et al. discloses an optical head comprising: a light source; an objective lens for focusing a light beam emitted from the light source on an information recording surface of an optical information recording medium; a plurality of optical elements; and an optical-electric conversion system; wherein the objective lens is the objective lens according to claim 1 (see Figure 1).

Regarding claim 5, Kitamura et al. discloses an optical information recording/reproducing apparatus, which comprises an optical head for recording or reproducing information optically with respect to an optical information recording medium and records or reproduces desired information with respect to the optical information recording medium, wherein the optical head is the optical head according to claim 4 (see Figure 1).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jorge L. Ortiz-Criado whose telephone number is (571) 272-7624. The examiner can normally be reached on Mon.-Thu.(12:30 pm- 9:00 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea L. Wellington can be reached on (571) 272-4483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
